NV 3108 Novell ZENworks 10.3 Configuration Management Administration

Course Summary

Description

The Novell ZENworks 10.3 Configuration Management Administration course teaches students the fundamental concepts, processes, and architecture of Novell ZENworks 10 Configuration Management using Novell ZENworks 10 Configuration Management and be able to perform basic administrative tasks. Students will then build their administrative knowledge and skills by performing more involved administrative tasks (such as migrating ZENworks 7 Desktop Management or implementing patch management) for products that are integrated into ZCM 10 SP3.

Objectives

At the end of this course, students will be able to:

- Describe Novell ZENworks 10 Configuration Management
- Install Novell ZENworks 10 Configuration Management
- Migrate a Traditional ZENworks Environment to ZENworks 10 Configuration Management
- Register Devices for ZENworks Configuration Management
- Manage ZENworks Bundling
- Configure ZENworks Configuration Management Policies
- Configure Remote Management
- Image Computers with ZENworks Configuration Management
- Manage Inventory and Data Collection
- Run ZENworks Configuration Management Reports

Topics

- Describe Novell ZENworks 10 Configuration Management
- Install Novell ZENworks 10 Configuration Management
- Migrate a Traditional ZENworks Environment to ZENworks 10 Configuration Management
- Discover, Register, and Deploy Devices for ZENworks Configuration Management
- Manage ZENworks Bundling
- Configure ZENworks Configuration Management Policies
- Configure Remote Management
- Image Computers with ZENworks Configuration Management
- Manage Inventory and Data Collection
- Run ZENworks Configuration Management Reports

Audience

This course is designed for:

- Novell software system administrators, integrators, and engineers
- Networking consultants
- Reseller/partner technical support staff
- New Novell ZENworks 10 Configuration Management customers

NV 3108 Novell ZENworks 10.3 Configuration Management Administration

Course Summary (cont'd)

Established Novell software administrators with no ZENworks 10 experience can take this course if they are already familiar with using eDirectory (and related tools such as iManager) and have some experience administering products such as ZENworks Desktop Management.

New Novell customers tasked with evaluating or administering Novell ZENworks 10 Configuration Management can also attend this course but should have a basic familiarity with Novell eDirectory, Microsoft Active Directory, and Windows Server.

Prerequisites

Before taking this course, you should have a basic understanding of networks and networking (as introduced in the CompTIA Network+ certification). In addition, you should be familiar with the fundamentals of an LDAP-compliant Directory service (such as Novell eDirectory or Microsoft Active Directory). Some experience with fundamental Linux administration will also be helpful.

Duration

Five days
