EX401 Red Hat Enterprise Deployment, Virtualization, and Systems Management Expertise Exam

Course Summary

Description

The Red Hat Enterprise Deployment, Virtualization, and Systems Management Expertise Exam is a performance-based test of the skills covered in the RH401 Red Hat Enterprise Deployment, Virtualization, and Systems Management course. To enroll in this exam, one must have an RHCE on a current release at the time of the exam.

Counts towards RHCA certification
This expertise Certificate of Expertise is one of five required to earn the designation Red Hat Certified Architect (RHCA).

Each course in the RHCA curriculum is followed by an expertise exam on the fifth day. Expertise exams may be taken immediately following the corresponding course, or at any time. The exams are performance-based and test skills of the job role competencies covered in the prior four days of hands-on training. Passing an expertise exam earns the candidate an additional Certificate of Expertise to his or her RHCE credential for that specific enterprise skill set. Expertise exams vary in length from 2 to 8 hours depending on the course, and can only be taken by current RHCEs. Official notification of PASS or DID NOT PASS is sent via email within 3 weeks of the expertise exam.

Audience

Only RHCEs on a current release may take this exam. All candidates are strongly advised to take RH401 Red Hat Enterprise Deployment, Virtualization, and Systems Management in advance of attempting this exam.

Duration

Two-eight hours.
