

## **Preparation for the PMP Exam Course Summary**

### **Description**

The Project Management Institute's Project Management Professional (PMP) certification has become the universal standard for the profession. The PMP certification is required by many organizations looking for project managers. This course will prepare the student to take the new PMP examination through practice exams, workshops and class discussion. You will learn essential terminology and processes from the PMBOK Guide 4<sup>th</sup> Edition.

### **Objectives**

By the end of this course, students will be able to:

- Start the PMP application process
- Understand the PMBOK structure
- Learn the Five Project Management Process Groups
- Learn the Nine Project Management Knowledge Areas
- Understand how the knowledge areas fit into the process groups
- Identify and map the inputs, outputs and techniques for each of the knowledge areas
- Improve your exam-taking techniques through multiple PMP-style practice exams
- Create your own plan for self-study after this course

### **Topics**

- The Application Process
- The Exam
- Project Management framework and process groups
- Scope Management processes
- Time Management processes
- Cost Management processes
- Project Quality Management processes
- Project Risk Management processes
- Project Human Resources Management processes
- Project Communications Management processes
- Project Management processes
- Procurement Management processes
- Project Integration Management processes
- Professional Responsibility for project managers
- Create your own study plan to prepare for the exam

### **Prerequisites**

There are no prerequisites for this course.

### **Audience**

This course is most valuable to experienced project managers intending to take the PMP exam. Participants should be aware of PMP exam eligibility criteria established by PMI.

### **Duration**

Four days
