

## **Hyperion System 9 BI+ Interactive Reporting Designing Dashboards Using Dashboard Studio**

### **Course Summary**

#### **Description**

This one-day course provides Hyperion Interactive Reporting developers and power users with the ability to develop dashboards using Dashboard Studio without the need for having JavaScripting experience.

#### **Objectives**

At the end of this course, students will be able to:

- Creating dashboards with Hyperion System 9 BI+ Dashboard Studio
- Configuring filter features
- Customizing graphics within dashboards
- Using Import to import existing Interactive Reporting (BQY) sections
- Utilizing Merge to combine sections from multiple documents into one
- Planning considerations for dashboard development

#### **Prerequisites**

Students should have completed the Hyperion Interactive Reporting or Hyperion (Brio) Intelligence (v6 or 8) training course. Alternatively, one should be able to build data models and queries and develop Pivots, Charts and Reports using Interactive Reporting Studio, Intelligence (Explorer or Designer), or Web Client.

#### **Duration**

One day
