

NV 3090 Deploying Novell Open Enterprise Server 2 for Linux

Course Summary

Description

The Deploying Novell Open Enterprise Server 2 for Linux course (3090) prepares NetWare CNEs to migrate their NetWare/OES services to an OES 2 for Linux server. In addition, this course covers more advanced deployment topics such as support, patches and upgrades, troubleshooting, etc.

Objectives

At the end of this course, students will be able to:

- Understand the process for migrating services and data from NetWare to Open Enterprise Server 2 for Linux
- Configure and maintain patches, upgrades, and installation of Novell Open Enterprise Server 2 for Linux
- Understand the principles for supporting Novell Open Enterprise Server 2 for Linux issues, including troubleshooting and maintenance
- Understand storage using Dynamic Storage Technologies (DST)
- Manage the administration of security on Novell Open Enterprise Server 2 for Linux
- Perform configuring tasks for Novell Open Enterprise Server 2 for Linux services

Topics

- Migrate Services and Data from NetWare to OES 2 for Linux
- Install and Configure Novell Open Enterprise Server 2 for Linux
- Find Support for OES 2 Linux Issues
- Implement Patches and Upgrades
- Maintain and Troubleshoot OES 2 for Linux
- Using Dynamic Storage Technology
- Administering Novell Certificate Server on OES 2 for Linux
- Configuring Storage Access Services on OES 2 for Linux

Audience

The audience for this course is the community of NetWare administrators and engineers (CNEs) interested in moving their servers from NetWare to Novell Open Enterprise Server 2 for Linux or installing Novell Open Enterprise Server 2 for Linux servers into their existing network. Additionally, those pursuing the Novell Certified Engineer Enterprise Services (NCE - ES) certification would find this course contains valuable information necessary for their test.

Prerequisites

Before taking this course, you should be a current NetWare 6 or Open Enterprise Server NetWare CNE, or have equivalent experience with the NetWare 6, NetWare 6.5, or Novell Open Enterprise Server for NetWare product. This includes strong experience with the following:
