Symantec Control Compliance Suite 11.0: Module Course Options

Course Summary

Description

The Symantec Control Compliance Suite (CCS) 11.0 Module Course Options is designed to enable IT professionals on the additional modules outside the standards manager module which is covered in the CCS 11 Administration Course. These modules each provide specific capabilities to CCS which help allow for a comprehensive compliance and security program for organizations. This instructor-led course will focus on the implementation and management of the separate modules with hands on experience with the solutions.

Objectives
At the end of this course, students will be able to:

- Define risk management concepts as they relate to Control Compliance Suite.
- Use the Risk Manager module to manage risk in your environment.
- Utilize the different types of risk soring methods.
- Take action on defined risks
- Recognize common policies and how organizations use them
- Define a process for keeping policies reviewed and up to date
- Use the Control Compliance Suite Policy Module to manage policies
- Explain the need for procedural controls to securing an environment.
- Install and configure the Control Compliance Suite Assessment Module.
- Manage questionnaires and invites
- Integrate with Control Compliance Suite

Topics

- Risk Management
- Policy Manager
- Assessment Manager

Audience

This course is for computer professionals involved with security compliance using CCS 11.0.

Prerequisites

You must have working knowledge of advanced computer terminology, including TCP/IP networking terms, security, and Internet terms, and administrator level knowledge of Microsoft Windows 2000/XP/2003 operating systems. You also must have prior knowledge of the Control Compliance Suite solution.
