VersionOne for Product Owners

Course Summary

Description

Learn how to organize, monitor and groom the product backlog, as well as how to plan releases. Explore VersionOne using your own demo project and consultant-guided, hands-on exercises. This class comes with a free, one-month subscription to access your VersionOne training system, so your mastery of VersionOne will continue.

Objectives
At the end of this course, students will be able to:

- Create your initial backlog by importing a large number of backlog items from an Excel spreadsheet into VersionOne.
- Create and manage your own product backlog and the relationships between stories and portfolio items
- Generate portfolio items and stories from requests
- Create and manage the product roadmap and goals
- Prioritize work
- Generate real-time sprint and project burndown and summary reports
- See progress of portfolio items and Issues
- Visualize and manage the complexities between portfolio items and stories
- Capture and include customer ideas in your product development process (Ultimate Edition)

Topics

- Importing using the Import Template
- Ranking
- Story Details
- Parent/Child portfolio item Decomposition and Management
- Associating stories to portfolio items
- Request Management and converting to stories and portfolio items

- Portfolio Item Board
- Portfolio Item Timeline
