

Microsoft SharePoint 2016: Site Owner

Course Summary

Description

Microsoft SharePoint 2016 is a platform designed to facilitate collaboration and allow people to use familiar applications and web-based tools to create, access, store, and track documents and data in a central location. As such, SharePoint has many distinct features that must be enabled and configured, and many content structures that can be selected, added, and configured. In this course, you will learn how to create, configure, and manage a SharePoint team site so that your team or organization can share information and collaborate effectively.

SharePoint content structures and configuration options are complex. Site owners must understand what features, options, and content structures are available in SharePoint, and how to properly configure them. With SharePoint sites, features, and content structures properly implemented, users will be able to securely share files, collaborate on documents, and access information they need to work with their colleagues more effectively.

Objectives

At the end of this course, students will be able to:

- Create a SharePoint team site and perform basic content management tasks on a single SharePoint site.
- Create and configure new sites.
- Add and configure document libraries.
- Add and configure lists.
- Create custom lists and forms.
- Assign permissions and access rights.
- Extend SharePoint functionality with web parts.

Topics

- Creating and Configuring a New Site
- Adding and Configuring Libraries
- Adding and Configuring Lists
- Creating Custom Lists and Forms
- Assigning Permissions and Access Rights
- Extending SharePoint Functionality with Web Parts

Audience

This course is designed for existing Microsoft SharePoint site users who need to create and manage a SharePoint team site.

Prerequisites

To ensure your success in this course, you will need basic SharePoint site user skills such as the ability to access and use lists, libraries, and documents on a typical SharePoint team site. You can obtain this level of skills and knowledge by taking the "Microsoft SharePoint 2016: Site User" course.

Duration

One day

Microsoft SharePoint 2016: Site Owner
