Tableau Desktop Bootcamp Training

Course Summary

Description

This Tableau Desktop Bootcamp training designed to take users from a beginner to more advanced levels. This course is a combination of the Tableau Desktop Fundamentals and Tableau Desktop Intermediate curriculum. It is for anyone who works with data – regardless of technical or analytical background.

The Tableau Desktop Fundamentals course is designed to help you understand the important concepts and techniques used in Tableau to move from simple to complex visualizations and learn how to combine them in interactive dashboards. This course will include extensive hands-on activities to re-enforce the skills and knowledge attained.

The Tableau Desktop Intermediate course is designed to expand your skills and distinguish yourself as a Tableau power user. You should understand how to build basic worksheets and dashboards, but may scratch your head when working with more complex issues.

Topics
