

Microsoft Office 365 Online (with Skype for Business)

Course Summary

Description

This course is an introduction to Microsoft Office 365 with Skype for Business in a cloud-based environment. It can be used as an orientation to the full suite of Office 365 cloud-based tools, or the Skype for Business lessons can be presented separately in a seminar-length presentation with the remaining material available for later student reference.

Using the Office 365 suite of productivity apps, users can easily communicate and collaborate together through Microsoft Outlook mail and Skype for Business instant messaging and online meetings. Additionally, the Microsoft SharePoint team site provides a central storage location for accessing and modifying shared documents. This course introduces working with shared documents in the familiar Office 365 online apps—Word, PowerPoint, and Excel—as an alternative to installing the Microsoft Office desktop applications. This course also introduces several productivity apps—Teams, Yammer, Planner, and Delve—that can be used in combination by teams for communication and collaboration.

Objectives

After taking this course, students will be able to:

- Build upon your knowledge of the Microsoft Office desktop application suite to work productively in the cloud-based Microsoft Office 365 environment
- Sign in, navigate, and identify components of the Office 365 environment.
- Create, edit, and share documents with team members using Word Online, Excel Online, PowerPoint Online, and Microsoft SharePoint.
- Collaborate and work with colleagues using the Team, Planner, and Yammer apps.
- Use email and manage contacts with Outlook on the web.
- Use instant messaging with Skype for Business.
- Conduct online meetings with Skype for Business.

Topics

- Getting Started with Office 365
- Collaborating with Shared Files
- Using Productivity Apps
- Using Outlook on the Web
- Communicating with Skype for Business
- Using Skype for Business Meetings

Audience

This course is designed primarily for cybersecurity practitioners preparing for or who currently perform job functions related to protecting information systems by ensuring their availability, integrity, authentication, confidentiality, and non-repudiation. It is ideal for those roles within federal contracting companies and private sector firms whose mission or strategic objectives require the execution of Defensive Cyber Operations (DCO) or DoD Information Network (DoDIN) operation and incident handling. This course focuses on the knowledge, ability, and skills necessary to provide for the defense of those information systems in a cybersecurity context, including protection, detection, analysis, investigation, and response processes.

In addition, the course ensures that all members of an IT team—regardless of size, rank, or budget—understand their role in the cyber defense, incident response, and incident handling process.

Microsoft Office 365 Online (with Skype for Business)

Course Summary (cont'd)

Prerequisites

To ensure your success, you will need to be familiar with the Windows operating system and a web browser. You also need competence in using the locally installed version of Microsoft Outlook for email and calendaring, and should be familiar with at least one of the primary applications in the Microsoft Office suite (Microsoft Word, Microsoft PowerPoint, and Microsoft Excel).

To meet these prerequisites, you can take any one or more of the following courses:

- Using Microsoft Windows 10 (PT9854)
- Microsoft Office Outlook 2016: Part 1 (PT10535)

And any one or more of the following:

- Microsoft Office Word 2016: Part 1 (PT10540)
- Microsoft Office Excel 2016: Part 1 (PT10531)
- Microsoft Office PowerPoint 2016: Part 1 (PT10537)

Duration

One day

Microsoft Office 365 Online (with Skype for Business)

Course Outline

I. Getting Started with Office 365

- A. Sign In to Office 365
- B. Navigate the Office 365 Environment

II. Collaborating with Shared Files

- A. Work with Shared Documents in SharePoint
- B. Edit Documents in Office Online
- C. Collaborate on the SharePoint Site
- D. Work with OneDrive for Business and Delve

III. Using Productivity Apps

- A. Work with Productivity Apps in Combination
- B. Broadcast Messages with Yammer
- C. Collaborate with the Teams App
- D. Manage Tasks with the Planner App

IV. Using Outlook on the Web

- A. Send and Receive Email
- B. Manage Contacts
- C. Schedule Appointments
- D. Personalize Outlook on the Web

V. Communicating with Skype for Business

- A. Overview of Skype for Business
- B. Use Instant Messaging
- C. Make Voice and Video Calls

VI. Using Skype for Business Meetings

- A. Initiate Meetings
- B. Use Meeting Controls and Options
- C. Customize Skype for Business

VII. Appendix A: Interacting with Mobile Devices
