

SAFe Scrum Master Certification

Course Summary

Description

In this two-day course, you'll gain an understanding of the role of Scrum Master in a SAFe enterprise. Unlike traditional Scrum Master training that focuses on the fundamentals of team-level Scrum, the SAFe 4.0 Scrum Master course explores the role of Scrum in the context of the entire enterprise, and prepares you to successfully plan and execute the Program Increment (PI), the primary enabler of alignment throughout all levels of a SAFe organization. This includes learning the key components of scaled Agile development, how Scrum is facilitated throughout the enterprise, and how to execute iteration planning. You'll also discover how to build high performing Agile teams by becoming a servant leader and coach, and how to coach those teams to deliver the maximum business value that is achievable through SAFe. The SSM certification signifies that you are prepared to perform the role of Scrum Master in a SAFe environment, increasing your value to teams and organizations that are implementing SAFe.

Associated Certification: SAFe Scrum Master (SSM).

Exam Name: SAFe® 4 Scrum Master Exam

- Exam Format: Multiple Choice
- Exam Delivery: Web-based; Open Book
- Exam Access: First attempt free within 30 days from course completion date
- Exam Duration: Candidates have 30 days from course completion date to answer all questions and submit their exam
- Number of Questions: 43
- Passing Score: 31 (72%)
- Sample Test Questions

Attendees may be eligible to apply for 15 PDUs toward their continuing education requirements with the Project Management Institute (PMI) for PMP and PMI-ACP certifications. Attendees may be eligible to apply for SEUs under category C, toward earning or renewing their CSP through Scrum Alliance.
