

CA Output Management for End-users

Course Summary

Description

This course is designed to teach an overview of the capabilities and architecture of the CA Output Management products CA-View and CA-Deliver, and provide hands-on training of end-user functions of the CA-View and the CA Output Management Web Viewer. Students will get hands-on experience in how to get job output into CA-View, and how to view and print SYSOUT, reports, and report bundles using the CA-View 3270 terminal and the CA Output Management Web interface.

Topics

- Overview of the CA-View Product
- Relationship of CA-View, CA-Deliver, CA-Spool
- How to collect job output into CA-View
- Viewing archived output via 3270 terminal
- Viewing archived output via web browser
- Printing archived output
- Troubleshooting tips and tricks

Audience

The audience consists of CA View End-users.
