

## SAFe for Teams

### Course Summary

#### Description

This 2-day course teaches how to work with your colleagues to become a productive Agile Team, how to build your backlog, and how to plan and execute iterations. Attending the class prepares you to take the exam and become a certified SAFe® Practitioner (SP).

#### Objectives

By the end of this course, students will be able to:

- Apply SAFe® to scale Lean and Agile development in your enterprise
- Know your team and its role on the ART
- Know all other teams on the train, their roles and the dependencies between the teams
- Plan iterations
- Execute iterations, demo value, and improve your process
- Plan Program Increments
- Integrate and work with other teams on the train

#### Topics

- Introducing the Scaled Agile Framework® (SAFe®)
- Building an Agile Team
- Planning the Iteration
- Executing the Iteration
- Executing the Program Increment

#### Audience

In particular, the following individuals from large enterprises would benefit most from this class: all stakeholders of an Agile Release Train at the beginning of its SAFe journey. Development, QA and Infrastructure professionals. Product and Product Line Staff. System and Solution Architects. This course is particularly suited to organizations where disrupting existing governance processes will be difficult or met with strong resistance.

#### Prerequisites

There are no prerequisites for this course.

#### Duration

Two days  
16 PDUs
