

ALM/Quality Center v12 Business Models

Course Summary

Description

This course encompasses creating business models with ProVision by MetaStorm. Focus will be put on breaking down the processes of your business into simple steps in order to translate them into the building blocks for a business model. Once completed those business models will be imported into ALM/Quality Center to be linked to requirements.

Topics

- Breaking Down Business Processes
- Building Business Models
- Using ALM/Quality Center
- Translating To Your Own Company

Audience

Administrators, ALM/Quality Center users, QA testers, Business Managers
