

Advanced Certified ScrumMaster (A-CSM)

Course Summary

Description

Advanced Certified ScrumMaster (A-CSM) is an in-depth two day immersion into the world of the ScrumMaster role. The class explores Agile Facilitation and Agile Coaching and how the ScrumMaster uses these skills to support the team, the Product Owner and the Organization. The class is full of real world examples from the attendees experiences and coaches attendees through practical tools and techniques that can be implemented immediately at your workplace. The class is a deep dive into your role as a ScrumMaster and the hands-on activities and exercises demonstrate key concepts and let you experience the next level of Scrum firsthand.

Objectives

After taking this course, students will be able:

- Explain Agile and Lean Values and Principles, so that I can better appreciate Scrum
- Understand Agile Facilitation, so that I can better support my team
- Understand Agile Coaching, so that I can coach my Team, Product Owner and Organization
- Explore self-organization, so that I can support my Development Team in becoming Self Organized
- Explore team dynamics, so that I can help my team work together better
- Explore Definition of Done, so that I facilitate my team creating one
- Understand the Value of Engineering Practices, so that I coach my team on how to incorporate them
- Understand Service to the Product Owner, so that I can effectively support my Product Owner
- Explore resolving impediments, so that I can effectively support my team
- Understand Scaling Scrum, so that I can understand the pros and cons of scaling
- Explore Organizational Change, so that I can effectively support my organization
- Explore Scrum Mastery, so that I can expand my personal ScrumMaster skills

Topics

- The Agile values in your organization
- How to best facilitate and coach team members, customers, executives and stakeholders
- Techniques to help your team on their journey to self-organization
- Expanding the impact of Scrum in your organization
- Identify ways to scale Scrum and Agile beyond your team

Audience

This course is designed for:

- Individuals who have been in the ScrumMaster role for at least 12 months
- IT Leadership (Managers/Directors/VPs/CIOs/CTOs)
- Project Managers
