

## Deploy and Manage Citrix SD-WAN - Essentials (CNS-230-1)

---

### Course Summary

#### Description

Learn the various SD-WAN implementations and deployment modes available, and how to choose the one that is right for your organization. Take a tour of the underlying architecture of SD-WAN and learn how to differentiate between the various components. Understand how the different elements of SD-WAN come together to provide a better network experience. Topics include: Quality of Service, Classes of Service, Rules, Dynamic Routing, DHCP Services, Zero Touch Deployment, and the SD-WAN management tools available. Hands-on labs are provided.

This course is currently on Citrix SD-WAN version 10.x

#### Objectives

After taking this course, students will be able to:

- Deployment options available
- Initial configuration and management of Citrix SD-WAN
- Provisioning and management considerations
- SD-WAN security considerations
- SD-WAN optimizations available

#### Topics

- Citrix SD-WAN Introduction and Overview
- Citrix SD-WAN Deployment Modes and Configuration
- Citrix SD-WAN Provisioning and Change Management
- Citrix SD-WAN Security Considerations
- Citrix SD-WAN Quality of Service
- Citrix SD-WAN Optimizations

#### Audience

This course was built for IT Professionals working with Citrix SD-WAN, with little or no previous SD-WAN experience. Potential students include administrators, engineers, and architects interested in learning how to deploy or manage Citrix SD-WAN.

#### Prerequisites

Before taking this course, you should have the following:

- Understanding of different computer networks such as LAN and WAN
- Familiarity with data-carrying techniques, including Multiprotocol Label Switching (MPLS), Metro Ethernet, and VPN tunneling
- Understanding of techniques for increasing data transfer efficiencies / WAN optimization
- General understanding of branch network technologies; Routing, Firewall, DHCP, Internet control, Quality of Service

#### Duration

Three days

## Deploy and Manage Citrix SD-WAN - Essentials (CNS-230-1)

---

### Course Outline

- I. Citrix SD-WAN Introduction and Overview**
  - A. Citrix SD-WAN Functionality
  - B. Platforms & Editions
  - C. Initial Configuration
- II. Citrix SD-WAN Deployment Modes and Configuration**
  - A. Deployment Mode Options
  - B. Multi-Region Deployment
  - C. Interface Groups
  - D. Virtual IP Addresses
  - E. WAN Links
  - F. Change Management
  - G. Upgrading Deployments
  - H. Zero Touch Deployment Options
- III. Citrix SD-WAN Provisioning and Change Management**
  - A. Appliance Architecture
  - B. SD-WAN Management Architecture Options
  - C. Packet Processing and Architecture
  - D. SD-WAN Services
- IV. Citrix SD-WAN Security Considerations**
  - A. Citrix SD-WAN Physical Security
  - B. Appliance Security Considerations
  - C. Network Security
  - D. Stateful Firewall Considerations
  - E. Firewall Rules and Zones
  - F. Security Administration and Management
- V. Citrix SD-WAN Quality of Service**
  - A. Citrix SD-WAN Quality of Service
  - B. Classes of Service and Rules
  - C. Application Quality of Service
  - D. SD-WAN Transmit Modes
  - E. Bandwidth Provisioning
  - F. Deep Packet Inspection
- VI. Citrix SD-WAN Optimizations**
  - A. Dynamic Routing
  - B. IPsec Termination
  - C. MPLS Queues
  - D. Path State Sensitivity Control
  - E. Virtual Router Redundancy Protocol Support
