

## Manage Citrix Endpoint Management CEM-205

---

### Course Summary

#### Description

Students will explore how to manage Citrix Endpoint Management in this three day course. Venture into the cloud as students learn to manage devices, apps, and users. Students will learn how the architecture, management, and communication flow function with Citrix Endpoint Management Service and how they can fit their organization's needs. You will learn how to administer their Citrix Endpoint Management environment and how to support your end users, as well as working with applications and securing a variety of endpoints.

#### Objectives

After taking this course, students will be able to:

- Manage a Citrix Endpoint Management implementation in an On-premises or cloud environment
- Perform common enterprise mobility management tasks and mobile application management
- Understand the device enrollment process
- Perform monitoring, troubleshooting, and reporting on a Citrix Endpoint Management Enterprise solution

#### Topics

- Introduction to Citrix Endpoint Management
- Citrix Endpoint Management Architecture
- Cloud Components
- Common Device Management Tasks
- Device Enrollment
- Managing Device Security
- Working with Apps
- Integrating Citrix Content Collaboration
- Maintaining and Troubleshooting
- Monitoring and Reporting

#### Audience

This course is built for IT Professionals interested in learning how to manage Citrix Endpoint Management on-premises or cloud environments using leading practices. Potential students include administrators and implementers.

#### Prerequisites

Before taking this course, you should have the following knowledge and experience:

- Microsoft Windows Server 2012 R2 or Windows Server 2008 R2 , and Microsoft Windows 8.1 or Windows 7
- Mobile device operating systems, such as iOS and Android
- Network architecture and terminology

#### Duration

Three days

## Manage Citrix Endpoint Management CEM-205

### Course Outline

- I. Introduction to Citrix Endpoint Management**
  - A. Citrix Endpoint Management Features
  - B. Citrix Cloud and Citrix Endpoint Management
  - C. Citrix Endpoint Management User Experience and Security
  - D. Citrix Endpoint Management Entitlements
- II. Citrix Endpoint Management Architecture**
  - A. Citrix Endpoint Management Prerequisites
  - B. Citrix Endpoint Management Server
  - C. Citrix Endpoint Management and Microsoft Intune
  - D. Apple APNs and Google Firebase Cloud Messaging
  - E. MDX Architecture and Features
- III. Cloud Components**
  - A. Cloud Component Overview
  - B. Onboarding and Access
  - C. Cloud Connector and Cloud Resource Locations
  - D. Cloud Migration
  - E. Cloud Updates and Features
- IV. Common Device Management Tasks**
  - A. Administrative Console Overview
  - B. Delivery Groups
  - C. Device Policies
- V. Device Enrollment**
  - A. Enrollment Methods
  - B. iOS Device Enrollment
  - C. Android Device Enrollment
  - D. Windows 10 Enrollment
  - E. Other Devices
- VI. Managing Device Security**
  - A. Security Policies
  - B. Automated Actions
  - C. Android for Work
  - D. ActiveSync Filtering
  - E. Shared Devices
- VII. Working with Apps**
  - A. Application Integration
  - B. Citrix Endpoint Management Productivity Apps
  - C. Application Security with MDX
  - D. 3rd Part Applications
- VIII. Integrating Citrix Content Collaboration**
  - A. Citrix Content Collaboration Overview
  - B. Integrating Citrix Endpoint Management with Content Collaboration
  - C. Content Collaboration Workflows
- IX. Maintaining and Troubleshooting**
  - A. Maintaining Citrix Endpoint Management
  - B. Maintaining Certificates
  - C. Troubleshooting Citrix Gateway (formerly NetScaler Gateway)
  - D. Troubleshooting Tools for Citrix Productivity Apps
  - E. Firewall Issues
- X. Monitoring and Reporting**
  - A. Monitoring and Reporting of Devices
  - B. Monitoring and Reporting of Citrix Content Collaboration
