

VMware vRealize Operations for Operators V6.x - EDU-VROPSOP6X-OE

Course Summary

Description

This course is designed for data center operators who are responsible for the day-to-day management of a VMware vSphere environment using VMware vRealize Operations. This course will teach you how to use vRealize Operations as a forensic and predictive tool. The course is based on VMware ESXi 6.5, VMware vCenter Server 6.5, and vRealize Operations 6.6.

Note: If you have taken the VMware vRealize Operations Manager: Install, Configure, Manage course, duplicate content makes this course unsuitable for you

Topics

- :: Course Introduction
- :: Introduction to vRealize Operations
- :: vRealize Operations User Interface
- :: vRealize Operations Concepts
- :: Troubleshooting System Health Issues
- :: Capacity Planning
- :: Tags, Application Groups, and Custom Object Groups
- :: Policies

Audience

This course is designed for Operators responsible for the day-to-day operation of a vSphere environment

Prerequisites

This class requires completion of one of the following courses, or system administration experience with vSphere deployments:

- :: VMware vSphere: Install, Configure, Manage [V6.5]
- :: VMware vSphere: Optimize and Scale [V6.5]

Duration

2 Days/Lecture & Lab
