

Microsoft Office Outlook 2019: Part 2

Course Summary

Description

In this course, you will customize command sets, configure mail accounts, set global options, perform advanced searches, apply filters to intercept mail and control spam, create rules to automate mail management tasks, work with calendars and contacts, manage tasks, preserve data with archives and data files, as well as share and delegate access to your Outlook items. In short, you'll work with a wide range of features and options and, in so doing, understand why Outlook is a leading personal management system.

This course builds upon the foundational knowledge presented in the Microsoft Office Outlook 2019: Part 1 course and will help you customize a communication system well-suited to your work style.

Objectives

After taking this course, students will be able to use Outlook's advanced features to customize and manage your email communications, including using advanced features to organize emails; managing calendar settings and options; managing contact information; scheduling tasks; and managing Outlook archives and data file settings

Topics

- Insert objects in messages, and modify properties and global options.
- Organize, search, and manage messages.
- Protect your mailbox and manage its size.
- Use rules and Quick Steps to automate message management.
- Work with advanced calendar settings.
- Import and forward contacts.
- Manage activities by assigning tasks to others
- Delegate access to and share Outlook items with others.
- Archive and back up Outlook items using data files.

Audience

This course is intended for people who have a basic understanding of Microsoft Outlook and want to know how to use Outlook's advanced features to manage their email communications, calendar events, contact information, search functions, and other communication tasks.

Prerequisites

To ensure your success in this course, you should have end-user skills with any current version of Windows, including being able to open and close applications, navigate basic file structures, and manage files and folders. Additionally, it will benefit you to have basic Outlook skills. You can obtain these skills and knowledge by taking the following Logical Operations course: Microsoft Office Outlook 2019: Part 1

Duration

One Day

Microsoft Office Outlook 2019: Part 2
