

## MS-300T03 A Enabling Microsoft Teams for Collaboration

---

### Course Summary

#### Description

In this 1-day course, Microsoft Teams is the hub for Teamwork in Microsoft 365. In this course you will learn how to plan, deploy and manage Microsoft Teams. Specifically, this course discusses the relationship of Teams with SharePoint, OneDrive and Office 365 Groups. It provides best practices for the adoption and deployment of Teams within your organization. It also covers how to establish guest policies and data governance for your Teams data.

This course is part of the 5 day MS-300: Deploying Microsoft 365 Teamwork comprehensive course. <https://www.protechtraining.com/moc-28300-1-deploying-microsoft-365-teamwork-part-1-pt21919>

#### Objectives

After taking this course, students will be able to:

- Plan for a Microsoft 365 Teams deployment.
- Configure Office 365 for Teams.
- Configure teams and channels in Microsoft Teams.
- Manage user access to Teams.
- Configure Teams for meetings.
- Establish a data governance strategy for Teams data.

#### Topics

- Plan a Microsoft Teams Deployment
- Configure Microsoft Teams
- Manage the Teams Environment

#### Audience

This course is for the Microsoft 365 teamwork administrator role. The role is responsible for configuring, deploying, and managing Office 365 and Azure workloads that focus on efficient and effective collaboration and adoption. They manage apps, services, and supporting infrastructure to meet business requirements. The administrator is aware of and can differentiate between products and services but may not directly manage each product or service. The Teamwork administrator must be able to deploy, manage, migrate, and secure SharePoint (online, on-premises, and hybrid), OneDrive, and Teams.

The Teamwork administrator has a fundamental understanding of integration points with the following apps and services: Office, PowerApps, Flow, Yammer, Microsoft Graph, Stream, Planner, and Project. The administrator understands how to integrate third-party apps and services including line-of-business applications.

#### Prerequisites

Learners should start this course already having the following skills:

- Basic understanding of Active Directory and Azure AD.
- Basic understanding of mobile device management, and alternative operating systems (Android and macOS).
- Experience with Windows PowerShell.

#### Duration

One day
