

VMware Mirage: Install, Configure, Manage v5.0 - HMICM5 v5.0

Course Summary

Description

This hands-on training course provides students with skills that they need to deploy a unified image management system using VMware Mirage. After installing Mirage 5.0, students learn how to configure security, manage images, perform a Windows migration, set up endpoint protection, and perform various management functions.

Topics

- :: **Course Introduction**
- :: **Introduction to Mirage**
- :: **Components and Architecture**
- :: **Installing and Configuring Mirage**
- :: **Mirage Management Overview**
- :: **Mirage Web Manager**
- :: **Mirage Single Image Management**
- :: **Windows Migrations**
- :: **Endpoint Protection with Mirage**
- :: **Working with the Mirage File Portal**
- :: **Mirage Security**

Audience

This course is designed for experienced system administrators and system integrators responsible for deploying Mirage.

Prerequisites

- :: Ability to use VMware vSphere Client to view the state of virtual machines, datastores, and networks
- :: Experience accessing the guest operating system from the VMware vCenter Server virtual machine console
- :: Ability to navigate Windows 7, Windows 8.1, and Windows Server 2008.

Duration

3 Days/Lecture & Lab
