

## Traps 4.2: Install, Configure, and Manage - PAN-EDU-281 v4.2

---

### Course Summary

#### Description

Palo Alto Networks® Traps™ Advanced Endpoint Protection prevents sophisticated vulnerability exploits and unknown malware-driven attacks. Traps accomplishes this through a highly scalable, lightweight agent that uses an innovative new approach for defeating attacks without requiring any prior knowledge of the threat itself.

#### Topics

**Successful completion of this two-day, instructor-led course equips the student to install Traps in basic configurations. Upon completion of this course, students will be able to: Learn how Traps protects against exploits and malware-driven attacks Install and configure the Endpoint Security Manager (ESM) and Traps endpoint components; build rules; enable and disable process protections Integrate Traps with Palo Alto Networks WildFire™, which provides prevention and detection of zero-day malware.**

#### Audience

**Security Engineers System Administrators Technical Support Engineers**

#### Prerequisites

Students must have Windows system administration skills and familiarity with enterprise security concepts.

#### Duration

2 Days
