

## VMware vCloud Networking and Security for vSphere Professionals - VCNS55

---

### Course Summary

#### Description

This intensive training course focuses on installing, configuring, and managing VMware vCloud Networking and Security for VMware vSphere professional use. vCloud Networking and Security is a suite of security virtual appliances built for VMware vCenter Server and VMware ESXi integration. vCloud Networking and Security is a critical security component for protecting virtualized data centers from attacks and helping you to achieve your compliance-mandated goals. The course is based on VMware vShield 5.5, ESXi 5.5, and vCenter Server 5.5.

#### Topics

- :: **Course Introduction**
- :: **VMware Networking and Security**
- :: **VMware vCloud Networking and Security**
- :: **VXLAN Networks**
- :: **Securing the Data Center**
- :: **VMware vCloud Networking and Security Edge**
- :: **VMware vCloud Networking and Security App**
- :: **Endpoint Security**
- :: **VMware vCloud Networking and Security Data Security**

#### Audience

**This course is designed for System administrators and system integrators responsible for deploying vCloud Networking and Security.**

#### Prerequisites

- :: Willingness to participate in demanding, high-intensity training
- :: Experience with vSphere
- :: Comfort with system administration using command-line interfaces

#### Duration

3 Days/Lecture & Lab
