

TOGAF Training Program-Combined V9.2.

Course Summary

Description

The program enables organizations to standardize on open method for IT architecture and avoid a lock-in to the proprietary methods of different consulting firms. Customers can base their IT architecture on an open, industry standard method, which works with all major frameworks, and can procure tools, training, and the services of consultants (individuals and integrators) with confidence, on the basis of certified conformance with TOGAF 9.2 standards. For service providers and tool vendors, the certification provides a vehicle to clearly demonstrate that their services and products support and use the methodology and product sets that TOGAF 9.2 certifies.

Objectives

This course prepares participants for:

- The adoption of the TOGAF 9.2 framework.
- The implementation of the TOGAF 9.2 framework and associated processes
- TOGAF Architecture Development Method.
- Architecture guidelines, principals and techniques.
- Architecture Content Framework.
