

## VMware Workspace ONE: Unified Endpoint Management Troubleshooting [V19.x] - EDU-WS1UEMTS19-OE

---

### Course Summary

#### Description

In this two-day course, you learn to investigate, analyze, and determine issues that might occur with all the different components of the VMware Workspace ONE® UEM (Unified Endpoint Management) platform. Troubleshooting is the backbone of service maintenance and management. Understanding how to effectively troubleshoot product issues enables administrators to understand how product services communicate and function—in turn optimizing service and software health management.

#### Topics

By the end of the course, you should be able to meet the following objectives:

- Summarize the general logic of Workspace ONE UEM issue troubleshooting
- Describe when and why to use logs for troubleshooting
- Outline the best practices for Workspace ONE UEM console issue troubleshooting
- Outline the steps of collecting Workspace ONE UEM Device Services logs
- Summarize the process flow of VMware AirWatch® Cloud Connector™
- Summarize the best practices of Workspace ONE UEM Enterprise Integration issue troubleshooting
- Understand the various methods for logging and troubleshooting supported device endpoints
- Summarize the general troubleshooting logic of resolving Email Management issues
- Troubleshoot VMware AirWatch® Secure Email Gateway™ or PowerShell related issues
- Summarize the best practices of Application Management issue troubleshooting
- Summarize the best practices of Content Management issue troubleshooting

#### Audience

Workspace ONE administrators, account managers, solutions architects, solutions engineers, sales engineers, technical support engineers, and consultants

#### Prerequisites

This course requires completion of one of the following courses:

- VMware Workspace ONE: Deploy and Manage
- VMware Workspace ONE: Skills for Unified Endpoint Management

#### Duration

2 Days
