

## Designing HPE Hybrid Cloud Solutions, Rev. 19.41 - 1128288

---

### Course Summary

#### Description

The Designing HPE Hybrid Cloud Solutions course is a Web-Based Training that is approximately 20 hours of self-directed content. It includes lectures and activities in the ratio of approximately 15% activities and 85% lecture. Given a customer scenario, apply cloud solutions and concepts to architect solutions that can help achieve customers' business outcomes. This includes experience with multicloud technologies and cloud deployment models. It also includes an understanding of automation, management, and orchestration tools to optimize resiliency, availability, performance, deployment, and manageability.

#### Topics

**Explain the HPE Approach to Cloud Management Services, Consulting, and Infrastructure  
Describe Third Party and Other Cloud Technologies  
Explain the Purpose and Use of Automation, Orchestration, and Scripting Tools  
Describe Containers including Kubernetes, Docker, and Mesosphere  
Analyze Consumption Models  
Evaluate Advanced Cloud Concepts and Protocols  
Explain the Capabilities and Positioning of Cloud-Enabled HPE Infrastructure and Services**
