

Firewall Essentials: Configuration and Management EDU-210 (9.1) - PAN-EDU-210 v9.1

Course Summary

Description

<p>Successful completion of this five-day, instructor-led course should enhance the student's understanding of how to configure and manage Palo Alto Networks next-generation firewalls. The student should learn and get hands-on experience configuring, managing, and monitoring a firewall in a lab environment</p>

Topics

<p>**The Palo Alto Networks Firewall 9.0 Essentials: Configuration and Management (EDU-210) course is five days of instructor-led training that will help you to:** ▪ Configure and manage the essential features of Palo Alto Networks nextgeneration firewalls ▪ Configure and manage GlobalProtect to protect systems that are located outside of the data-center perimeter ▪ Configure and manage firewall high availability ▪ Monitor network traffic using the interactive web interface and firewall reports</p>

Audience

Security Engineers, Security Administrators, Security Operations Specialists, Security Analysts, Network Engineers, and Support Staff

Prerequisites

Students must have a basic familiarity with networking concepts including routing, switching, and IP addressing. Students also should be familiar with basic security concepts. Experience with other security technologies (IPS, proxy, and content filtering) is a plus.

Duration

5 Days
