

Firewall: Optimizing Firewall Threat Prevention EDU-214 (9.1) - PAN-EDU-214 v9.1

Course Summary

Description

The Palo Alto Networks Firewall 9.0: Optimizing Firewall Threat Prevention (EDU-214) course is four days of instructor-led training that emphasizes the PAN-OS® threat prevention capabilities. After completing this course, you should be able to:

- Describe the cyber-attack lifecycle and recognize common forms of attack
- Describe PAN-OS® threat prevention capabilities
- Use firewall logs and reports to make better configuration decisions
- Configure the firewall to detect, block, and record threats

Topics

Successful completion of this four-day, instructor-led course should enhance the student's understanding of how to better configure, manage, and monitor PAN-OS® threat prevention features. The student will get hands-on experience configuring, managing, and monitoring threat prevention features in a lab environment.

Audience

Security Engineers, Security Administrators, Security Operations Specialists, Security Analysts, Network Engineers, and Support Staff

Prerequisites

Participants must complete the Firewall 8.1 Essentials: Configuration and Management course, or have equivalent experience. Students must have a basic familiarity with networking concepts including routing, switching, and IP addressin

Duration

4 Days
