

VMware Workspace ONE: Deploy and Manage [V22.x]

Course Summary

Description

In this course, you will configure and secure unified endpoint activation, registration, and authentication. You will learn how to integrate industry-recognized enterprise technologies with VMware Workspace ONE. Through a combination of hands-on labs, simulations, and interactive lectures, you learn how to configure and manage the endpoint lifecycle. The principles of enterprise mobility, unified endpoint, and identity management are addressed throughout the course. You will leave the training empowered with the foundational skills and knowledge needed to effectively implement Workspace ONE.

Topics

- Course Introduction
- Introduction to Workspace ONE Unified Endpoint Management
- Workspace ONE UEM Console
- Workspace ONE UEM Architecture
- Mobile Endpoint Enrollment and Management
- Windows 10 Onboarding
- Securing and Configuring Endpoints
- Application Access and Security
- Email Configurations
- Content and Resources Implementation
- Workspace ONE Intelligence and UEM Reporting
- Digital Workspace
- Workspace ONE Access Console
- Workspace ONE Platform Architecture
- Digital Workspace Integration
- Productivity Integration
- Web and Virtual Application Management
- Single Sign-On for Applications

Audience

This course is designed for Workspace ONE administrators, experienced mobility and identity administrators, account managers, solutions architects, solutions engineers, sales engineers, and consultants

Duration

Five Days

VMware Workspace ONE: Deploy and Manage [V22.x]

Course Outline

- I. Course Introduction**
 - A. Introductions and course logistics
 - B. Course objectives
- II. Introduction to Workspace ONE Unified Endpoint Management**
 - A. Outline the basic principles and capabilities of Unified Endpoint Management with the Workspace ONE
 - B. Platform.
 - C. Summarize basic implementation of Workspace ONE UEM
 - D. Investigate Modern Windows Management with Workspace ONE UEM
- III. Workspace ONE UEM Console**
 - A. Outline features of the Workspace ONE UEM Console
 - B. Navigate the Workspace ONE UEM Console
- IV. Workspace ONE UEM Architecture**
 - A. List the common Workspace ONE UEM Integration Components
 - B. Outline the core components of Workspace ONE UEM
 - C. Outline the benefits of implementing Directory Services Integration
 - D. Summarize the benefits of implementing Certificate Authority Integration
 - E. Describe the benefits of implementing Email SMTP Integration
 - F. Describe the benefits of deploying VMware AirWatch Secure Email Gateway
 - G. Explain the purposes of deploying VMware Unified Access Gateway
 - H. Describe the benefits of deploying VMware Tunnel
 - I. Summarize the functions of Content Gateway
- V. Mobile Endpoint Enrollment and Management**
 - A. Outline UEM options
 - B. Configure Workspace ONE UEM for Endpoint Management
 - C. Enroll Mobile endpoints
 - D. Describe the functions and benefits of the Apple Device Enrollment Program
 - E. Outline the steps to enroll an Android Endpoint into Workspace ONE UEM with the out-of-box enrollment flow
- VI. Windows 10 Onboarding**
 - A. Outline basic principles of Windows 10 Endpoint Onboarding
 - B. Onboard Windows 10 desktop with basic IT-driven and user-driven enrollment methods
 - C. Outline the steps of configuring Cloud Windows 10 Auto Discover Service
 - D. Summarize the steps of configuring Azure AD integration
 - E. Use Office 365 applications for Windows 10 desktop enrollment
 - F. Explain Windows 10 Desktop out-of-box enrollment
- VII. Securing and Configuring Endpoints**
 - A. Summarize the comprehensive endpoint and console security features provided by Workspace ONE UEM Console
 - B. Assess uses of administrative roles
 - C. Examine the proper use of profiles and resources for endpoint management
 - D. Explain Windows 10 policy management
 - E. Outline product provisioning
 - F. Configure compliance policies
 - G. Manage endpoints with Workspace ONE UEM
 - H. Use the Self-Service Portal to manage an endpoint

VMware Workspace ONE: Deploy and Manage [V22.x]-EDU-WS1DM20-OE

Course Outline (cont.)

VIII. *Application Access and Security*

- A. Describe the functions and benefits of using application management capabilities in Workspace ONE UEM
- B. Summarize application management capabilities of Workspace ONE UEM
- C. Plan a public application management strategy
- D. Design an application security strategy
- E. Examine the Windows 10 Business Store Portals role in your application management strategy
- F. Deploy Win32 applications

IX. *Email Configurations*

- A. Describe the benefits of managing email with Workspace ONE UEM
- B. Deploy managed email settings
- C. Evaluate email integration models
- D. Support the implementation of AirWatch Secure Email Gateway
- E. Integrate PowerShell
- F. Support Google Sync integration
- G. Evaluate email compliance policy strategies
- H. Describe the features and functionality of the Email Notification Service

X. *Content and Resources Implementation*

- A. Describe the benefits of performing content management with Workspace ONE UEM
- B. Summarize the functions and benefits of Workspace ONE Content application
- C. Evaluate the benefits of the Workspace ONE Content application
- D. Access content and repositories from the Workspace ONE Content application

- E. Support end-user use of the personal content feature
- F. Implement a content management strategy that allows for access on endpoints
- G. Access internal repositories with the Content Gateway

XI. *Workspace ONE Intelligence and UEM Reporting*

- A. Summarize the features and functionality of Workspace ONE Intelligence
- B. Evaluate the impact Workspace ONE Intelligence can have on a UEM strategy
- C. Execute a report strategy
- D. Outline the steps of integrating Syslog with Workspace ONE UEM
- E. Weigh the benefits of a telecom management

XII. *Digital Workspace*

- A. Evaluate the impact of integrating the Digital Workspace
- B. Outline the core components of Digital Workspace
- C. Evaluate the impact of utilizing virtual desktop infrastructure as part of your UEM strategy

XIII. *Workspace ONE Access Console*

- A. Navigate the Workspace ONE Access Console
- B. Execute directory integration with Workspace ONE Access
- C. Develop an identity and access management strategy

XIV. *Workspace ONE Platform Architecture*

- A. Evaluate Workspace ONE deployment options
- B. Describe the VMware recommended Workspace ONE Architecture

VMware Workspace ONE: Deploy and Manage [V22.x]-EDU-WS1DM20-OE

Course Outline (cont.)

- C. Examine High Availability and Disaster Recovery options
- XV. *Digital Workspace Integration***
 - A. Integrate Directory Services with Workspace ONE UEM and Workspace ONE Access
 - B. Synchronize users and groups from Directory to Workspace ONE Consoles
 - C. Integrate Certificate Authority with Workspace ONE UEM
 - D. Outline the steps for performing Digital Workspace integration
 - E. Integrate the Digital Workspace
 - F. Stage resources for Workspace ONE registration and management
 - G. Register and manage endpoints with Workspace ONE
 - H. Elevate the management level of an endpoint from Workspace ONE registered to Workspace ONE managed
 - I. ware Workspace ONE Verify
- XVI. *Productivity Integration***
 - A. Formulate productivity integration needs
 - E. ware Workspace ONE Verify
- XVII. *Web and Virtual Application Management***
 - A. Formulate a web and virtual application management strategy
 - B. Configure web and virtual applications
 - C. Manage web and virtual applications
- XVIII. *Single Sign-On for Applications***
 - A. Describe the single sign-on capability provided by Workspace ONE
 - B. Summarize how single sign-on can be used for native mobile applications
 - C. Outline the authentication methods supported by Workspace ONE
 - D. Evaluate the effectiveness of VM
- XIX. *Unified Access Gateway***
 - B. Deploy the Unified Access Gateway
 - C. Install and configure VMware Tunnel
 - D. Install and configure the VMware Content Gateway
 - E. Install and configure AirWatch Secure Email Gateway
