

Professional Kanban 1

Course Summary

Description

Scrum with Kanban is a course that teaches Scrum individuals how to apply Kanban practices to their work. We use theory and hands-on exercises to emphasize the importance of transparency and demonstrate the Scrum Flow.

Scrum has become standard for how Agile teams work. In this class, students will learn how additional practices from Kanban can be introduced into their Scrum Teams without changing their Scrum model. Students will learn how to add the right Scrum practices to get the benefit of Kanban.
