

## CA File Master Plus for DB2 for IMS: User Basics in the Eclipse UI 200

---

### Course Summary

#### Description

CA File Master Plus for IMS is an IMS database data manipulation tool that speeds segment editing and data creation. CA File Master Plus for IMS enables you to issue commands in batch, browse and edit data, and make quick changes to production or test databases.

Using step-by-step demonstrations and simulations, this course shows you how to browse and edit IMS databases and use additional utilities via the Eclipse User Interface (UI).

#### Objectives

By the end of this course, students will be able to:

- Access and personalize your CA-File Master Plus for IMS environment
- Browse and edit IMS databases
- Filter data using selection criteria
- Use utilities

#### Topics

- Getting Started
- Eclipse UI – Using the Open Database Wizard
- Eclipse UI – Browsing a Database
- Eclipse UI – Browsing Using Selection Criteria
- Eclipse UI – Editing a Database

#### Audience

This course is designed for:

- Database Administrator
- Developer
- QA/QC Tester
- Database Analyst

#### Prerequisite

- Familiarity with IMS databases
- Experience with Interactive System Productivity Facility/Program Development Facility (ISPF/PDF)

#### Duration

One Half Day

## CA File Master Plus for DB2 for IMS: User Basics in the Eclipse UI 200

---

### Course Outline

- I. *Getting Started***
  - A. Manage files in directory list view
  - B. Configure mainframe settings and setup individual server preferences
- II. *Eclipse UI – Using the Open Database Wizard***
  - A. Use the Database Open Wizard to browse or edit database
  - B. Display segments using display modes
- III. *Eclipse UI – Browsing a Database***
  - A. Browse a database in the Eclipse UI
  - B. Display segments using display modes
  - C. Use primary commands
  - D. Use concatenated key view
- IV. *Eclipse UI – Browsing Using Selection Criteria***
  - A. Use catalogued selection criteria by importing selection criteria that reside in the Selection Criteria Parm PDS
  - B. Dynamically modify existing criteria to filter segments
- V. *Eclipse UI – Editing a Database***
  - A. Edit a database in the Eclipse UI
  - B. Use rollback and commit commands
