

CA Brightside Support Offering 100

Course Summary

Description

CA Brightside assures that high-performing organizations can effectively, securely, and comprehensively implement z/OS open source tools in their environments. In addition to quality and security verified software distributions, the subscription license includes the kind of enterprise class, 24x7 technical support that is traditionally offered with proprietary software products. CA Brightside customers also gain exclusive access to a continually refreshed list of innovations, engineered by Broadcom, that have not yet been contributed to the open source community.

This course will introduce you to CA Brightside and its main components.

Objectives

By the end of this course, students will be able to:

- Articulate the business value of CA Brightside
