

CA 1 Tape Management: Tape Processing

Course Summary

Description

A typical z/OS organization processes thousands of tape files daily. These files represent priceless corporate data that needs to be completely protected throughout its lifecycle. CA 1 automates day-to-day tape management while providing comprehensive protection against destruction of tape files. Apart from tape data protection it also enables library management and automation of typical z/OS organizations. In this course, you will learn about tape data sets and tape labels and how these tape characteristics relate to CA 1 tape management

Topics

- Describe the characteristics and structure of tape data sets
- Use JCL to request tape input and tape output
- Explain open, close, end-of-volume, and dynamic label change process
- Explain types of tape labels in existence and their use

Duration

One Half Day

Course Outline
