

CA 1 Tape Management: Initialization and Operation

Course Summary

Description

A typical z/OS organization processes thousands of tape files daily. These files represent priceless corporate data that needs to be completely protected throughout its lifecycle. CA 1 automates day-to-day tape management while providing comprehensive protection against destruction of tape files. Apart from tape data protection it also enables library management and automation of typical z/OS organizations. In this course, you will learn how to start CA 1, the messages that are produced, and some of the system abends that may occur.

Topics

- Describe the functions of TMSINIT and the proper responses to initialization prompts
- Explain the purpose and nature of tape processing messages
- Describe CA 1 user and system abends and take proper recovery actions

Duration

Three Quarter Hour
