

Nutanix Advanced Administration and Performance Management (V5.15)

Course Summary

Description

This course features comprehensive coverage of advanced administration and performance management for Nutanix clusters. You'll learn how to monitor and tune clusters for better system performance, and optimize datacenter administration. This course explains in detail how to use Acropolis services such as Volumes, Files and Objects. The course also explains how to define, manage, and secure workloads and applications using Calm and Flow, including automation of the Life Cycle Management (LCM) application, and how to implement and configure Self Service Portal and governance. This course also covers Data Protection solutions such as Metro Availability with Witness. Advanced management using the new features of Prism Central and the command line are also covered in detail. This includes how to take advantage of machine learning with entity management and resource optimization as well as how to plan for future growth using Scenario Management using Prism Pro.

Objectives

After taking this course, students will be able to:

- Monitor datacenter performance and manage components to optimize system performance.
- Implement advanced solutions for business continuity and data protection in Nutanix datacenters.
- Design high-performing networks to support Nutanix clusters.
- Customize Nutanix security features.
- Deploy all Nutanix storage solutions: Files, Volumes, and Objects.
- Use Prism Central to:
 - Identify and fix cluster health problems
 - Exploit machine learning for entity management and resource optimization
 - Plan for future growth
- Manage assets and applications using Calm, Life Cycle Management (LCM)
- Practice advanced datacenter management procedures using hands-on labs.
- Get the most out of Nutanix systems by maximizing configuration and operation for peak efficiency.
- Validate your new skills by preparing for and completing the Nutanix Certified Advanced Professional (NCAP) certification.

Topics

- Advanced Network Configuration and Management
- Managing and Securing Nutanix Clusters
- Deploying and Securing VM Workloads
- Deploying Nutanix Volumes
- Implementing Nutanix Files
- Configuring Nutanix Objects
- Implementing Data Protection
- Understanding and Troubleshooting AOS Performance

Audience

This course is designed for IT administrators, architects, and business leaders who already manage Nutanix clusters in the datacenter, but who would like more in-depth knowledge of Nutanix datacenter administration. It is also for anyone preparing for the Nutanix Certified Advanced Professional (NCAP) certification.

Prerequisites

Before taking this course, students should have:

- Nutanix Enterprise Cloud Administration (ECA) classroom training or NCP certification
- Basic knowledge of Nutanix datacenter administration techniques
- Familiarity with traditional virtualization storage architectures
- Comfortable with Linux command-line interface

Duration

Four days
