

CA Cleanup for z/OS: Using CA Cleanup for ACF2 200

Course Summary

Description

CA Cleanup reduces the effort and pressure associated with maintaining current regulatory, statutory, and audit requirements. It does this by removing obsolete, unused, redundant, and excessive access rights through easily automated, virtually unattended, and continuous cleanup of mainframe security databases CA ACF2™, CA Top Secret®, and IBM RACF®. This course shows how to use CA Cleanup for ACF2.

This course is one of several Web-Based Training courses that contain the same information as the CA Cleanup Instructor-Led Training.

Topics

- Customize the CA Cleanup jobs for your site
- Run and analyze reports
- Describe the command and backoutfile syntax
- Describe include and exclude statements and advanced features
- Perform a security file cleanup in full or phased

Duration

Thirty minutes
