Course Outline

ChangeMan ZMF Client Pack Fundamentals

Course Summary

Description

This course provides the concepts and skills to use ChangeMan ZMF Client Pack for Windows access to z/OS datasets and JES job queues, and to integrate mainframe access from ODBC, .NET, and XML tools.

Objectives
At the end of this course, students will be able to:

- ChangeMan ZMF panels
- Mainframe z/OS file system as a windows drive letter
- Mainframe datasets and JES job queues
- Software assets residing on the mainframe without file transfers

Topics

- Understanding and navigating the Client Pack Windows interface
- Navigating to z/OS data and software asset features
- Integrating mainframe access from Excel and Crystal Reports
- Submitting mainframe jobs
- Viewing JES input/output queues
- Accessing ChangeMan ZMF instances, applications, packages, and libraries appear as Windows folders

Audience

The course is intended for software developers, administrators, and other users of ChangeMan ZMF.

Prerequisites

There are no prerequisites for this course.

Duration

One half day
