

## Designing Dashboards Using Hyperion Dashboard Studio

### Course Summary

#### Description

This one-day course provides analysts and developers with the ability to create complex dashboards using Hyperion Dashboard Studio and without needing to have knowledge of JavaScript.

#### Topics

- Create dashboards with Hyperion Dashboard Studio
- Add charts, pivot tables and band-style reports to dashboards
- Configure filter controls in dashboards
- Use Import to import existing Interactive Reporting sections into Dashboard Studio templates
- Utilize Merge to combine sections from multiple documents into one
- Configure advanced Dashboard Studio features

#### Audience

This course is ideal for business analysts, report developers, and end-users.

#### Prerequisites

Prior to taking this class, students must have completed the Designing Queries & Reports course or have a thorough understanding of how to create queries and reports using Hyperion Interactive Reporting.

#### Duration

One day
