

ITIL v3 Operation Support and Analysis Capability (OSA)

Course Summary

Description

This course immerses learners in the practical aspects of the ITIL v3 Service Lifecycle and processes associated with the Operational Support and Analysis of services and service delivery. The main focus of this course is on the operational-level process activities and supporting methods and approaches to executing these processes in a practical, hands-on learning environment. This training is intended to enable the holders of the certificate to apply the practices in resolution and support of the Service Management Lifecycle. This course is designed using an engaging scenario-based approach to learning the core disciplines of the ITIL best practice and positions the student to successfully complete the associated exam.

Objectives

At the end of this course, students will be able to:

- Understand the importance of Service Management as a Practice concept and Service Operation principles, purpose and objective
- Understand the importance of ITIL Operational Support and Analysis while providing service
- Understand how all processes in ITIL Operational Support and Analysis interact with other Service Lifecycle processes
- Know what are the processes, activities, methods and functions used in each of the ITIL Operational Support and Analysis processes
- Use the ITIL Operational Support and Analysis processes, activities and functions to achieve operational excellence
- Explain how to measure ITIL Operational Support and Analysis
- Understand the importance of IT Security and its contributions to ITIL Operational Support and Analysis
- Understand technology and implementation considerations surrounding ITIL Operational Support and Analysis
- Understand the challenges, Critical Success Factors and Risks associated to ITIL Operational Support and Analysis

Audience

- Individuals who have their ITIL v3 Foundation Certificate (or the ITIL v2 Foundation + v3 Foundation Bridge certificate) who want to pursue the intermediate and advanced level ITIL certifications.
- Individuals and / or operational staff who require a comprehensive practical understanding of the Operational Support and Analysis processes and how these may be used to enhance the quality of IT service support within an organization, for example: operational staff involved in Event Management Process, Incident Management Process, Request Fulfillment Process, Problem Management Process, Access Management Process, Service Desk, Technical Management, IT Operations Management and Application Management
- IT professionals involved in IT Service Management implementation and improvement programs.
- IT professionals, IT / business managers and IT / business process owners, IT practitioners.

ITIL v3 Operation Support and Analysis Capability (OSA)

Course Summary (cont'd)
