Create Analyses And Dashboards using OBIEE

Course Summary

Description
This course provides in-depth instruction in using Oracle Business Intelligence Enterprise Edition (OBIEE) to create sophisticated analyses and then incorporating these analytic views into interactive dashboards.

During this two-day class, you will learn to use OBIEE Analyses to develop requests for data and then create views such as tables, graphs, and pivot tables. These views, as well as links to other reports and web sites, will then be incorporated into Dashboards to provide powerful metric and analytical tools.

Objectives
At the end of this course, students will be able to:

- Describe Oracle Business Intelligence Enterprise Edition (OBIEE) architecture, components, and features
- Construct analyses using measures (fact tables), dimensions, and dimension hierarchies using Oracle BI EE
- Create views such as tables, pivot tables, and graphs
- Design dashboards, which incorporate views, narratives, links, gauges, and additional objects
- Customize dashboards to meet particular needs of individuals and the organization
- Configure filters and prompts
- Utilize quality design practices
- Manage content and access in the Presentation Catalog

Audience
This course is designed for Report Developers, Business Analysts, Administrators and End-users.

Prerequisites
There are no prerequisites for this course.

Duration
Two days
