

Mt OS X 302 OS X Deployment 10.8

Course Summary

Description

This three-day course is designed to take Server support technicians and Mac users deep inside the Mt Lion Server operating system. The course will cover everything needed to successfully plan, deploy and maintain an OS X Mt Lion Server. Students will be able to demonstrate their new knowledge through 1:1 labs , specifically designed to enhance their learning experience. This course is ideally suited to provide the knowledge required to support an Enterprise Deployment of an OS X Mt Lion Server Solution.

Audience

This class is for Mac OS X system administrators who need to know how to streamline the process of installing and configuring a large number of computers running Mac OS X

Prerequisites

Students should have the following prerequisite knowledge prior to attending this course:

- Understanding of OS X
- Experience with OS X in a network environment
- Basic troubleshooting experience or Lion 101
- Basic OS X Server experience or Lion 201

Duration

Three days
