

## **Introduction to the Command-Line Mindset on OS X (CLI 100)**

### **Course Summary**

#### **Description**

Do you wish to wield the power of the Unix command line, but are intimidated by the cryptic syntax and seemingly-never-ending list of commands?

This two-day course is designed specifically to introduce you to The Command-Line Mindset, where you will learn to wield the power that is available only through the command-line.

After establishing a solid foundation, we'll explore command line tools to help with administration and management of your Mac.

#### **Audience**

This course is designed for anyone wishing to learn the basics (and more) of the Unix command line on Mac OS X.

#### **Prerequisites**

Students should have the following prerequisite knowledge prior to attending the course:

- Mac OS X knowledge

#### **Duration**

Two days
