

Informix Enterprise Replication

Course Summary

Description

The focus is on how to setup, configure, monitor and tune your database server data replication. The course will provide a toolkit of scripts and utilities to start ER and HDR replication on your Informix database servers.

Audience

This course is for database administrators responsible for managing Informix Enterprise Replication (ER) and High Availability Data Replication (HDR) on multiple Informix database servers.

Prerequisites

There are no prerequisites for this course.

Duration

Four days
